DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 4-12, 20-33, and 40-44 are rejected under 35 U.S.C. 102(b) as being anticipated by Saadatmanesh et al. U. S. Patent No. 5,242,438.

Saadatmanesh et al. disclose an apparatus for applying light to a site to be treated on a wall of a vessel in the human body, the apparatus comprising: a light-feeding instrument designed to guide light generated by an external light source to said site and to radiate said light onto said site; the light-feeding instrument comprising an elongated light guide that can be inserted into said vessel and can be displaced therein in a longitudinal direction of said vessel, and light-deflecting means 178 designed to direct said light fed through said light guide in a substantially radial direction onto said site to be treated as presently claimed (see Figs. 1, 3, 4, and 6-12).

As to claims 5, 6 and 28, they teach that the angle of reflecting surface relative to the longitudinal axis of the catheter (i.e., the longitudinal axis of the optical fiber) is about 45°, see col. 8, lines 48-49.

Art Unit: 3739

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-44 are rejected under 35 U.S.C. 103(a) as being unpatentable over Saadatmanesh et al., in view of Kittrell et al. U. S. Patent No. 5,104,392.

Saadatmanesh et al., described above, do not teach a holding means for fixing the treatment apparatus within the blood vessel.

Kittrell et al. disclose an apparatus for applying light to a site to be treated on a wall of a vessel in the human body, the apparatus comprising: a light-feeding instrument designed to guide light generated by an external light source to said site and to radiate the treatment site and holding means (i.e., balloons) for holding the apparatus within the vessel during the treatment. The light-feeding instrument comprising an elongated light guide that can be inserted into said vessel and can be displaced therein in a longitudinal direction of said vessel; light-deflecting means designed to direct said light fed through said light guide in a substantially radial direction onto said site to be treated as presently claimed (see Figs. 1, 7E, 8, 9, 13A-13F, and 18-24).

Therefore, it would have been obvious to one skilled in the art at the time of the applicant's invention to modify the device of Saadatmanesh et al in view of Kittrell et al. and use positioning/holding balloons in order to fixate/position the treatment catheter within the treatment site.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ahmed M. Farah whose telephone number is (571) 272-4765. The examiner can normally be reached on Mon-Thur. 9:30 AM-7:30 PM, and 9:30 AM - 6:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Linda C.M DVorak can be reached on (571) 272-4768. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
